

QIAGEN (Suzhou) Translational Medicine Co., Ltd

Company Introduction

QIAGEN (Suzhou)

QIAGEN (Suzhou) Translational Medicine Co., Ltd

– Total Solution Supplier of Biomarkers & Companion Diagnostics

QIAGEN (Suzhou) translational Medicine Co., Ltd is an **Innovative** company that provides **Unique Integrated Solutions** for **Biomarker and CDx** development and **Clinical Testing** for precision medicine. With state-of-the-art instruments, comprehensive translational science platforms and the experienced technical teams in pharmaceutical and diagnostic industry, QIAGEN (Suzhou) Translational Medicine Co. Ltd offers profound service from biomarker R&D, diagnostic assay development, to patient stratification test for drug clinical trials, as well as one-stop-shop solution of companion diagnostic product development and commercialization.

The total solution of QIAGEN (Suzhou) is mainly composed by two parts, one is the comprehensive translational science platforms, including liquid biopsy (exosomes, CTCs, ctDNA, etc.), PCR detection (DNA mutation, mRNA expression, miRNA/lncRNA, digital PCR, etc.), Sequencing service (Sanger Sequencing, pyrosequencing, NGS, etc.), bioinformatics service (TMB, TNB, Landscape analysis, etc.), pathology tests (IHC, FISH, digital pathology, remote pathology, etc.), protein analysis (ELISA, MSD, Western Blot, etc.), clinical research services, as well as biomarker and companion diagnostic product manufacturing and commercialization. The other is the CDx/IVD R&D based on the comprehensive platforms and focusing on target therapy and immunotherapy.

As a comprehensive translational medicine solution provider, QIAGEN (Suzhou) not only helps worldwide customers to accelerate their drug development and clinical trial process, but also offers individualized diagnosis and treatment solutions for the urgent medical care demands in China with our knowledge and expertise in translational medicine and the global leading diagnostic technologies.
